DELIVERY - From stock where possible, but due to the size of the Collection it is not possible to maintain a complete stock. Many of our negatives are glass plates and are taken by hand to our printer usually at intervals of 4 - 6 weeks. Thus, if we are sold out new supplies may take between six and eight weeks to despatch from receipt of your order. Please enclose a stamped addressed envelope with your order if you require an acknowledgement of your order.

Compliance with the Government's Coronavirus Lockdown Rules i.e. only travelling if essential means that if restrictions are reimposed it may not be possible to take negatives to the photograph printer as described above. Thus, if prints are not in stock, we may be unable to supply photographs within the stated timescale, please provide an email address on the Order Form so that we might update you if necessary. Your email address will **only** be used for this purpose.

QUALITY - It is our aim to provide good quality prints, however, as the quality of the negatives varies, the poorer subjects are included for the benefit of researchers. It is regretted that we cannot offer reduced prices for prints from inherently poor negatives - the prints still cost the same to produce. In order to help you with your selection, lists will show the following quality grading: -

- 1 - Indicates a sharp well composed and well exposed photograph;
- 2 - Indicates a slight deficiency in sharpness, contrast etc.
- 3 - Indicates a significant deficiency in sharpness, or spots, streaks etc. the photograph is listed for historical interest.

COPYRIGHT - Photographs are supplied only for private purposes and **they may not be reproduced in any form without the prior written permission of The Stephenson Locomotive Society**. The Society reserves the right to amend or change any of the information contained in this document or associated Order Forms or Lists of photographs without prior notification.
